

## OLSON STATEMENT

Craig D. Tobin, Paula Fuller Tobin and Genc Arifi obtained \$2,000,000 dollars on behalf of Natalia and Christine Olson for the wrongful death of their father, who was receiving treatment for depression and alcohol detox in a freestanding psychiatric unit after being cleared by the emergency room doctors to receive treatment in that fashion. Mr. Olson was a 66 year old retired Chicago Police Officer who had two prior heart attacks. While in the non-medical unit at a Chicago area hospital, Mr. Olson suffered a deadly cardiac event. Our winning position was that someone with Mr. Olson's pre-existing medical history should have gone through this process in a medical unit where he would be closely monitored and treated in case of cardiac event, which was foreseeable under the circumstances. Had he been treated in a medical unit, he would have been alive even when a cardiac event occurred. The settlement was paid by the hospital and the emergency physicians.
